

Advanced Adobe Premiere

Duration: 1 day

Adobe Premiere is a powerful non-linear video editing package, equipped with all the tools you need to create professional video for broadcast or the web.

This 1 day course gives delegates the chance to expand on the knowledge gained in the standard Premiere course, and to practise the new techniques in a mini project.

Course Content:

Monitor Window Editing

- Single Track mode
- Choosing sources and targets
- Insert & Replace
- Lift & Extract
- Three and four point edits

Advanced Tools

- Quick Crossfade
- Slip and Slide
- Rolling and Ripple Edit
- Virtual Clips

Titling

- Introducing the Premiere 6.5 titler
- Creating custom shapes
- When is a fill not a fill?

Rolls and Crawls

Course prerequisites:

- Attendance of the Premiere course, or equivalent knowledge.

Effects

- Overview of video effects
- Using Effect Controls
- Animating filters
- Techniques for faking nonlinear keyframing

Advanced Motion and Transparency

- Advanced Keying techniques
- Alpha channels in the Motion Window
- Fixing aspect ratio problems

Advanced Compression

- Using the Adobe MPEG Encoder
- Preparing Streaming Media
- Additional tools for dealing with compressed video.
