TRAINING

Advanced CSS

Duration: 1 day

Prerequisites

Candidates should have prior knowledge of HTML code and have completed our introductory CSS course (or have equivalent experience)

This Advanced CSS training course focuses on practical, advanced CSS techniques, including tableless design and CSS menus. An overview of CSS specifications and browser implementations provides an understanding of browser bugs and how to deal with them.

Objectives

After this Advanced CSS training course, delegates will:

- Gain hands-on experience of applying advanced CSS techniques
- Be able to create accessible web sites
- Have the skills to reduce page weight and increase response times.

Course Content

Introduction

- Overview of CSS specifications
- Browser implementations
- The document tree
- Accessibility

Tableless layouts

- Advanced positioning
- 2 column layouts
- 3 column layouts
- Nested floats
- Liquid layouts

Images

- Setting image captions
