TRAINING

Advanced Dreamweaver

Duration: 1 day

Prerequisites

Completion of our Dreamweaver Introduction course or equivalent knowledge

This one day Advanced Dreamweaver training course goes beyond Dreamweaver basics and gives delegates hands-on experience in using Dreamweaver's more advanced features. Delegates will work with advanced website creation tools available in Dreamweaver, including templates, JavaScript frameworks, CSS and tableless design.

Objectives

After this Advanced Dreamweaver training course, delegates will:

- Be able to create a web page without tables
- Understand how to use CSS for the layout of a page
- Know the problems that can occur when using CSS
- Have their work process in Dreamweaver streamlined

Course Content

Review of Dreamweaver Basics

- Short review of basics of laying up a page in Dreamweaver.
- Assembling a page in code view only, review of basic HTML

Advanced Cascading Style Sheets

- Review of basic selectors: tag, link, class, id
- Advanced CSS Selectors: descendant, universal
- External, Embedded and Inline Styles

Tableless design

- Review of tableless design: building two and three column layouts
- Nesting Divs

CSS Positioning

- Understanding CSS positioning
- Relative vs absolute positioning

Styling page elements using CSS

- Creating a CSS menu

Common CSS problems

- Common CSS browser bugs

Alternate media style sheets

- Overview of media types
- Adding a print style sheet to your site
