TRAINING

## Adobe After Effects

**Duration:** 2 days

**Prerequisites**

Familiarity with digital video formats

Adobe After Effects is a very large and powerful motion graphics application. Our two day introductory Adobe After Effects training course will provide those new to post production techniques the tools to use this powerful software.

Additional advanced modules can be booked in pairs to provide a bespoke course focusing on the areas of After Effects most relevant to you. The Advanced After Effects training course has more information on these modules.

### Objectives

After this Adobe After Effects training course, delegates will be able to:

- Create animations
- Use layers and transparency
- Add and create effects
- Render completed clips for output

### Course Content

#### How After Effects Works:

- Projects
- Compositions
- Layers
- Properties
- Effects
- Rendering

#### Projects and Compositions

- Importing and trimming footage
- Integration with Adobe Photoshop and Illustrator
- Layer Windows and the Composition Window
- Manipulation in the composition window: transformation, masks
- Nesting Compositions

#### Timeline vs Composition window

#### Switches, buttons and modes

- Track Matte

#### Properties 1: Transformations

- Temporal properties: rotation and opacity
- Spatial properties: position and anchor point

### More on Layer Windows

- Anchor Point Path
- Masks
- Effect Points
- Simple animation of properties
- Linear keyframes
- Motion path
- Auto-align along path

### Previewing

- Scale and Quality
- Reduced frame rate
- Wireframes
- Dynamic Preview

### Adding Effects

- Managing the Timeline
- Effects switches
- Animating effect properties
- Adjustment layers

### About Time

- Timestretching footage
- Time Remapping and holds
- Frame blending
- Time effects
- Synchronisation tricks

### Rendering

- Render Checklist
- Output Modules

### Basic Parenting and Expressions

- Using the pickwhip

### Useful Keyboard Shortcuts
