Android App Development

Duration: 5 days

Price: £995 + vat

Prerequisites

Prior knowledge of a modern object oriented language such as Java, C++, C#, Smalltalk, PHP5, etc. We will assume a reasonable standard of object oriented programming skill.

In this practical introduction to Android, you will create your own Android application, ready for entry into the Android Marketplace. We will work with a simulator, and also a variety of devices as we learn the real world skills you will need as an Android application developer.

Objectives

Upon completion of this training course, the delegate will be able to:

- Build your own Android Application and upload it to the Android Market.
- Develop for simulators and real devices.
- Learn all the basics of Android Development with Ice Cream Sandwich and the Java SDK.
