TRAINING

## Mobile Web Design with Dreamweaver & jQuery Mobile

**Duration:** 1 day

As mobile usage increases, mobile versions of websites are becoming more and more sought after. Adobe has now integrated the jQuery Mobile JavaScript framework to enable the creation of mobile websites from within Dreamweaver. This course will look at how to create a basic mobile website using this framework and how to add content to the site. The site is only meant to be viewed on a mobile device and contains all the finger gesture/swipe transitions and effects which make the website content easier to be viewed on a mobile.

### Objectives

Upon completion of this training course, the delegate will have:

- An overview of mobile websites and mobile websites vs apps
- Practical knowledge in creating pages and adding content
- Simple styling of the pages using themes
- Adding content transitions
