TRAINING

t: 01273 622272 e: info@siliconbeachtraining.co.uk w: www.siliconbeachtraining.co.uk

Mobile Web Design Week

Duration: 5 days

Price: £995 + vat

Prerequisites

Delegates should have good knowledge and practical experience of HTML and CSS, including tableless layout

Mobile web browsing is already huge, and increasing in popularity as more and more mobile users adopt smartphones. If your website isn't mobile-ready, you're already behind the curve, and could be losing business as a result.

This comprehensive Mobile Web Design training package is aimed at existing web designers and combines our HTML5, CSS3, Mobile Web Design and JavaScript courses to provide an unparalleled coverage of mobile web design best practice and hands on tuition in the emerging web technologies you will need.

Objectives

After these Mobile Web Design training courses, delegates will:

- Understand best practice when designing for mobile devices
- Be able to use HTML5 to develop standards compliant web pages compatible with mobile devices
- Use CSS3 to create multiple stylesheets to load device-specific layouts that work on a range of devices
- Use JavaScript to add interactivity to web pages for a richer user experience on mobile

Course Content

This Mobile Web Design Training package combines our HTML5, CSS3, Mobile Web Design and JavaScript courses. Each workshop can be booked in its own right as a standalone course - or in this comprehensive week-long package:

HTML5 Course - 1 Day

- Introduction to HTML5
- New Elements, Attributes and Event Attributes
- Rich Media
- Web Forms
- Accessibility and Validation
- JavaScript APIs - a brief mention

CSS3 Course - 1 Day

- Introduction to CSS3
- Selectors
- Borders
- Backgrounds
- Text Effects
