TRAINING

Web Design Week

Duration: 5 days

Price: £795 + vat

Prerequisites

Silicon Beach Training recommends that all delegates familiarise themselves with the Dreamweaver and Photoshop interfaces before attending

Testimonials

"I really enjoyed the Web Design Week course and I learned a lot - I'm putting it in to practice already, and one of my clients has just complimented me on my latest work"

Peter Stocks

This combination of Web Design training courses will enable attendees to produce well designed sites in terms of aesthetics and good navigation, using Dreamweaver and Photoshop to manage, create and upload websites.

All three of these web design training courses can be booked together to form a comprehensive week of web design training for just £795 + vat (£1,105 if booked separately).

Objectives

After these Web Design training courses, delegates will have:

- A knowledge of the latest web design theory and best practice
- The skills to design and build a website using Dreamweaver
- The ability to create graphic content for the web using Photoshop

Course Content

Introduction to Web Design - 1 day

- Whether you know how to click the buttons but need help with the principles of good web design, or you are a newcomer to web design and want to learn the rules before you start to design, this is the web design training course for you.
- This web design training course will teach you to avoid common mistakes and apply good design and navigation principles to your site.

Dreamweaver - 2 days

- This is a practical introduction to using Dreamweaver to efficiently create and manage websites which conform to current web standards.
- This two-day Dreamweaver training course covers planning, creating, editing, publishing and site management. Learn to use the full functionality of Dreamweaver to streamline your work process and create accessible, standards-compliant pages using style sheets and table-less layout.

Photoshop for Web Graphics - 2 days

- Photoshop allows web designers to produce a wide variety of optimised graphics by manipulating and composing scanned or drawn images, using powerful layering and masking techniques and a wealth of special effect filters.
- Learn how to create and optimise your images for the web.
