Adobe Premiere Elements is a powerful video editing program which provides professional results on an affordable budget.

The Premiere Elements certification is an Adobe training course that will provide those new to video production with a comprehensive practical introduction to designing and developing video projects with Premiere Elements.

Use this certification to learn how to create professional standard output for use in your company videos, interviews or web and blog content.

We provide private and in-company Premiere Elements courses which can be tailored to your requirements. Call us on +44 (0)1273 622272 to discuss your needs.

Course Objectives

Attending our Premiere Elements training course will give you the skills to:

- Import video to Premiere Elements
- Create Premiere Elements Projects
- Arrange and edit video clips
- Create professional transitions, titles and effects
- Add and mix audio to video projects
- Export and share finished video projects in a range of formats
