

Adobe Premiere Elements Training

Learn how to use Adobe Premiere Elements to edit and publish video to a professional standard for a range of applications, including web video and company presentations.

In one day cover the essentials needed to get started using Premiere Elements, from creating a project to exporting your finished video.

Objective

Attending our Premiere Elements training course will give you the skills to:

- Import video to Premiere Elements
- Create Premiere Elements Projects
- Arrange and edit video clips
- Create professional transitions, titles and effects
- Add and mix audio to video projects
- Export and share finished video projects in a range of formats

Details

Duration: 1 Day

Who is this course for

This certification is ideal for video editors looking to produce professional videos on a budget without any previous experience. We welcome attendees to bring their own video files, digital video cameras & accessories to use on the course but this is not essential.
