

Quark Training

This 1-day QuarkXpress Training Course provides a comprehensive coverage of the Quark page layout application. Quark is used worldwide to design and layout magazines, brochures and books. This instructor led Quark Course will provide you with all you need to know to combine text, pictures and other graphic elements, all of which together compose a page or series of pages.

Objective

On completion of this Quark course the delegate will be able to use QuarkXpress to:

- Design, layout and edit documents from single-page flyers and newsletters to multi-page magazines to books
- Add and edit text and images
- Create and add colour to the document
- Use style sheets to simplify text styling
- Output high resolution documents ready for print

Details

Duration: 1 Day

Course PreRequities

It's recommended that delegates familiarise themselves with the Quark interface before attending.
