

Agile Project Management Practitioner Conversion Training

This 1-day Agile Project Management Practitioner (APMP) Conversion Course is a world renowned and internationally accredited course that enables candidates that already possess the Agile Project Management Foundation Certification, to develop their practical knowledge of how to implement Agile Project Management techniques in business environments

Objective

The Agile Conversion course educates delegates on how to implement Agile Methodology and Agile Principles, in order to become more astute project managers with the skills to lead successful projects on a regular basis. Bridging the gap between Foundation and Practitioner status, this Agile Practitioner Conversion Course is intended for individuals looking to enhance their level of accreditation, in order to deliver productive Agile Projects with rigour, integrity, and project management clarity.
