- Be able to apply the benefits management knowledge to different management levels
- Be able to explain the 5 fundamental practices within the benefits management cycle
- Understand and explain the roles of a benefits manager and benefits management
- Be able to use and implement a benefits management methodology

### Details

**Duration:** 5 Days

### Who is this course for

There are no pre-requisites for this course however, you must pass the foundation course before taking the practitioner course.

## Course Content

The Foundation side of the course will measure whether you can understand the benefits management principles, applications, techniques, roles, responsibilities and documents, specifically to understand the:

- Definitions, scope and objectives of benefits management, barriers to its effective practice, and the key success characteristics
- Principles upon which successful approaches to benefits management are based
- Five practices contained within the Benefits Management Cycle and relevant techniques applicable to each practice
- Scope of key roles and responsibilities for benefits management and the typical contents of the main benefits management documentation
- Approaches to implementation and the factors to consider in sustaining progress

The Practitioner side of the course helps show that you have a reasonable grasp of how to apply and use the guidance in any given situation. Primarily you should be able to:

- Plan the implementation of benefits management, select appropriate strategies to sustain and measure progress
- Select and adapt principles, practices and techniques to suit different organizational environments
- Identify activities that should be undertaken during each of the practices of the Benefits Management Cycle together with the accountabilities and responsibilities of each of the defined roles
- Evaluate examples of benefits management information
- Analyse the solutions adopted in relation to a given scenario
