The MicroStrategy 10 Certification course provides an overview of Micro Strategy Architect, Micro Strategy intelligence server, Micro Strategy report services, Micro strategy Desktop and Advanced Micro Strategy desktop. The course enables the delegates to make better business decisions by analysing the data stored across their enterprise. MicroStrategy is a data visualisation platform designed to meet sophisticated business intelligence requirements. The course familiarises delegates with the Desktop and Web interfaces and provides actionable information to business users via web, e-mail and mobile devices. The MicroStrategy course is aimed at professionals who want to develop their knowledge about Micro Strategy tool and build their career in Business Intelligence.

The MicroStrategy 10 Certification training program provides essential knowledge and skills required by developers to create, schedule, execute and monitor the Dashboard processes and BI Reports. The delegates will learn how to create the Dashboards and Reports from MetaData, how to create Schema objects using the Architect design tool and how to integrate the data with Data Sources like Google Analytics and Hadoop. During the MicroStrategy course, the delegates will gain an understanding of MicroStrategy 10 BI suite, architecture, components and new features of MicroStrategy 10.

Prerequisites

The delegates must fulfill the following criteria before enrolling on the course:

- General relational database
- Basics of Unix and Windows Command line
- SQL basic knowledge
- Microsoft Windows GUI

Course Objectives

- Use the Architect design tool for designing Schema objects like Attributes, Facts and Hierarchies
- Create Schema and Application objects required to meet the needs of the user communities of both MicroStrategy Desktop and Web
- Using BI tools for managing the operational and analytical reports with dashboards
- Integrate your data with Data Sources like Google Analytics, Hadoop and even social media platforms like Facebook and Twitter
- Create Reports & Dashboards using MicroStrategy 10 Developer which is an advanced, Windows-based environment providing a complete range of analytical functionality
- Makes the data transfer quicker and easier by using the Data Wrangling
