What is IOSH Working Safely Training?

This IOSH Working Safely V5.0 course is designed to enhance understanding of workplace health and safety responsibilities - learning what adaptations can be conducted in order to promote core health and safety principles. Candidates will learn how to apply their acquired knowledge into the workplace in order to understand the importance of adhering to health and safety legislations and guidance. The course will help candidates appreciate how to preempt hazards, and distinguish the difference between a hazard and a risk. This internationally valued and recognised IOSH Certification demonstrates a candidate's desire for continued personal development and is also beneficial for businesses looking to reduce accidents/sick pay. Modular-based learning and clear visual examples will help candidates become conscientious health and safety work operatives - delivered with compassionate but professional integrity to enthuse a conscientious consideration for fellow employees as people, rather than workers. This IOSH Working Safety Certification is indefinitely valid, however it is recommended that candidates complete a refresher course every 3 years.

IOSH Working Safely Exam

Upon the completion of the instructor-led training course, individuals are required to undertake two IOSH exams, including:

- 10-Question Multiple Choice Exam
- 3 Hazard Spotting Exercises

Course Objectives

The objective of this IOSH Working Safely V5.0 Certification is to confirm candidates are aware of health and safety principles to prevent work-based hazards from injuring an individual or the environment

The IOSH Working Safely Certification Course covers topics including:

- Introducing Safe Working
- Distinguishing the difference between a hazard and a risk
