

Lean Six Sigma Black Belt Upgrade Training

The Lean Six Sigma Black Belt Upgrade training course makes it easy for organisations to get their staff to upgrade the Green Belt certificate to the Black Belt Course.

Delegates are required to have the Green Belt certificate before taking this course.

Objective

After attending our Lean Six Sigma Black Belt Upgrade training course, delegates will be able to:

- Apply intensive and diversified process improvement techniques to achieve greater efficiency and effectiveness
- Provide training, facilitation, direction to other team members and staff
- Analyse and advise on product and process improvement.

Details

Duration: 5 Days

Who is this course for

This training course is suited to project managers and managers looking to improve processes and increase efficiency within their organisation.

Course Content

Lean Six Sigma Green Belt - 5 days

At the heart of Six Sigma improvement and redesign activities are project teams. These teams will consist of people who want to use their knowledge and skills to improve the performance of processes and the business. Lean Six Sigma Green Belt training is focused on team members understanding and applying the Define Measure Analyse Improve and Control model which is the foundation of all Six Sigma projects. The focus of Six Sigma is fundamentally about quality, customer focus and cost, where as Lean is about cost and speed. This Six Sigma course blends a number of Lean concepts and tools into the Six Sigma DMAIC model.

The team leaders and team members are the brains and muscle behind the Lean Six Sigma programme. This Six Sigma Training Course equips delegates with the appropriate skills and tools to enable them to deliver current and future improvements.

Six Sigma Black Belt Conversion - 10 days

In most organisations there is recognition that employees who are trained Green Belts are capable of moving up to Black Belt level. It is important that this opportunity be available without having to complete the full Black Belt course.

This programme has been designed to incorporate those elements from the Black Belt training course that are additional to the Green Belt course.

Black Belts are individuals that apply intensive and diversified process improvement techniques to achieve greater efficiency and effectiveness. A Black Belt provides training, facilitation, direction, analysis and advises on product and process improvement.
