

This M_o_R® Practitioner Training course assesses and confirms that candidates have the correct skill-set in which to identify and avoid risks in M_o_R situations - allowing them to apply their knowledge to shape and transform risk management. Undertaking this course will develop a candidate's confidence to encourage open discussions regarding business issues to enhance delivery, reduce fundamental risks, and enhance financial productivity, through learning how to incorporate risk-centred frameworks into day-to-day business decision-making.

M_o_R® Practitioner Certification status will help candidates identify threats and opportunities at strategic, programme, project and operational levels in their respective organisations. [M_o_R® training](#) provides a generic framework for the management of risk across all parts of an organisation, and is therefore beneficial when striving for effective business functioning.

This risk management training course shows how M_o_R® can support governance, and how the principles and process can be used to support risk management in your organisation.
