What is MoV® Foundation Training?

This Management of Value (MOV®) Foundation Certification Course helps candidates acquire knowledge concerning how to realise and maximise business value, and utilise resources effectively. Led by highly experienced and accredited MOV® instructors, this course aims to give candidates the knowledge to supplement and assist Value Managers when making key business decisions, that correspond with project objectives and stakeholder requirements.

MOV® Training helps candidates to appreciate the business requirement to acknowledge risks within initial planning, in order to deliver results that are of worth and represent the business' objectives - elevating value. The training course will emphasise the importance of meticulously detailing a Project's scope and resource requirements prior to initiation, due to maximising the potential for success and decreasing dysfunctional resource-consuming processes. The MOV® Certification Course helps individuals in businesses to deliver quality-abundant, financially viable, and beneficial projects with a key focus on value to the business, stakeholders, and clients - enabling efficient project delivery.
