What is Primavera P6 Professional Advanced for Project Managers?

Primavera P6 Professional Advanced for Project Managers is a much sought-after certification that indicates that an individual is proficient in complex resource management, and designing, leading, and appraising multiple Primavera Projects simultaneously. Designed and therefore beneficial for Business Analysts, Project Managers, and Functional Implementers, the training course will cover topics to enhance resource management competencies including value analysis, logic diagrams, bucket planning, and advanced scheduling. Primavera Software is designed to give project managers unparalleled control and the ability to preside over several complex multifaceted projects - hence this Advanced Training course gives managers the required tools to utilise complex Primavera tools in a beneficial way for maximal business project productivity.

The Primavera P6 Advanced training course progresses knowledge acquired during the Foundation Certification, specifically learning how to apply more advanced principles such as top-down budgeting and earned value analysis. Led by accredited and highly experienced Primavera instructors, this training course is practically engaging in order to promote the development of transferable skill competencies. Utilising Primavera P6 Software, ensures meticulously planned and subsequently high performance projects, hence this course is beneficial for businesses looking to improve upon financial utilisation and in an attempt to diminish dysfunctional business processes. There are no examinations required for Primavera P6 Advanced for Project Managers Certification.
