PRINCE2® Agile Foundation is intended as another route for the delegates to take part in PRINCE2® Practitioner. This certification helps the delegates in positively receiving guidance on working and managing within agile projects and project teams. The delegates do not need any prior knowledge of PRINCE2® before attending this course. This is the foundation level that further leads to PRINCE2® Agile Practitioner.

Key things about PRINCE2® Agile Foundation:

- There are no prerequisites for PRINCE2® Agile Foundation
- This is another way for PRINCE2® Agile Practitioner and will not have any effect on the current prerequisites of PRINCE2® Agile Practitioner. Hence, the PRINCE2® foundation will also remain a valid route for PRINCE2® Agile Practitioner

What are the benefits of adopting Prince2® Agile training?

For individuals:

- The certification is accessible to everyone who wishes to deliver agile projects in the organisation
- The professionals can achieve world-renowned certification
- Understand the PRINCE2® basics
- Learn how to tailor various methods and techniques in the context of agile methodology
- Gain comprehensive knowledge of concepts and terminologies of Agile including Kanban, Scrum and many more

For businesses:

- Enable well-organized flexibility within the organisation
- Lessen the risk of products that has low-quality
- Encourage transparent working practices
- Provide demonstrable value earlier within the organisational projects
