

What is Mobile SEO Training?

Mobile search is predicted to overtake desktop search by 2014, and with commercial intent much stronger than on desktop can you afford to ignore Mobile SEO?

Our brand new, one-of-a-kind **Mobile SEO Training course** will introduce you to Mobile search and what you need to do to make sure you're visible to your customers in mobile search results.

Mobile searches are forecast to overtake desktop searches by the beginning of 2014, and yet most [SEO](#) campaigns still focus entirely on desktop search.

Optimising for mobile requires a different tool kit with technical, local, personalised, social and content considerations affecting how visible your site is for mobile searchers.

This Mobile SEO training course will show you can take advantage of mobile traffic and beat your competitors to a great mobile search experience. Candidates will gain an understanding of their audience and competitors to identify SEO potential. Candidates will be shown what tools they can use to enhance their mobile website, and learn which tools suit which practices.

In terms of deciding what kind of mobile experience to serve up to your users, you can [download our free Mobile Development eBook](#).

This Mobile SEO workshop is ideal for SEO practitioners who want to expand their skill set - if you're new to SEO then we recommend coming on our [1-day SEO course](#) first.
